RIS-PRCI-IFPRI Capacity Building Programme National Training on Agricultural Trade Policy Analysis

The RIS-PRCI-IFPRI capacity-building programme on “National Training on Agricultural Trade Policy Analysis” will be held at Chandigarh from 29-30 September 2022. Applications are invited for the training programme from policy analysts, researchers and candidates pursuing M.Phil/Ph.D programme in the areas of agricultural research.

The two-day training programme would focus on contemporary challenges faced by the global and regional agricultural trade sector in the context of bilateral, regional, and multilateral trade relationships and issues. The programme would generate awareness among participants relating to the global debate on various agricultural issues. It also aims to impart hands-on training on the application of various trade and tariff indicators, using the RIS agricultural trade database. Training sessions will include disseminating results from the trade flow analysis work conducted in India, Nepal, and Sri Lanka.

RIS would cover the shortest travel cost and boarding facilities for the selected eligible participants attending the programme at Chandigarh. Participants must carry their laptops with them for the training sessions.

Interested candidates may apply and send their CVs to dgoffice@ris.org.in latest by **23 September 2022**.
